

PA720/PA240 Software Release Notes

To Update

Copy the supplied .hex file onto a USB memory stick (formatted as FAT32) and ensure it is called **image.hex**
Put the USB memory stick into the USB port on the rear of the unit.

- Power the unit off/on. At power up the unit will detect that a USB memory stick is present, and check for the **image.hex** file. If found the update will begin.

During the update the LED will flash red.
