

SA30 Dirac Live Quickstart

Contents

These instructions

USB mic & USB cable

Initial Setup

OPTION 1 - Supplied calibration microphone:

Connect the USB mic using the supplied USB cable to a free USB port on your PC/MAC

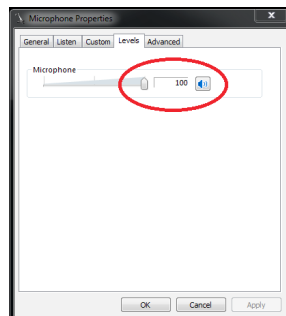

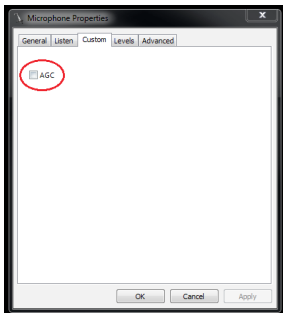

OPTION 2 - If you have a 3rd party mic, such as the XTZ Pro mic, or miniDSP UMIK-1, connect as per the manufacturers instructions.

For PC users:

Check that the AGC setting is OFF (e.g. in Windows 7, Start > Control Panel > Hardware and Sound > Manage Audio Devices > Recording > Microphone > Properties > Custom > AGC is unticked)

The level is set to max (e.g. in Windows 7, Start > Control Panel > Hardware and Sound > Manage Audio Devices > Recording > Microphone > Properties > Levels > 100) .

Getting Started With Dirac Live

To download the Dirac Live PC/MAC application, go to :

<https://live.dirac.com>

Download and install the Dirac Live application on your PC/MAC.

Ensure that the SA30 is connected to the same network as your PC/MAC.

Start the Dirac Live application

It is important to select the correct USB microphone and also load the microphone calibration file within the Dirac Live v2 application, use the **Arcam_AVRMicCal2.txt** calibration file. If you have a 3rd party mic, ensure that is selected and the correct calibration file is used.
