ARCAM

USB UPDATE INSTRUCTIONS

ST25

Software Update

Software updates are periodically made available to improve functionality and performance where possible. The ST25 is designed to process these updates overnight whilst in standby with an established internet connection using Wi-Fi or Ethernet.

Requirements:

- The ST25 must be connected to the internet by Wi-Fi or Ethernet. If there is no internet connection available, the USB update method can be used.

Check for update:

Follow these instruction to check for an update and install it:

- Power on the ST25 and allow it to boot until the Presets are displayed.
- Connect to the ST25 with the ARCAM Radia app.
- In the app, select the cog icon in the top right corner to access the network settings menu.
- Navigate to **Internet Update** and then **Check for update**
- Where an update is available, the ST25 will begin the update. During the process, the display can go blank for short periods.

Do not remove power from the ST25 during this process

- Once complete the unit will restart.

ARCAM ST25 Software Release V1.10.5

© Harman International Industries, Incorporated. Features, specifications, and appearance subject to change without notice.
