

- Arcam's most versatile iPod® dock to date
- Made for: iPhone 5, iPhone 4S, iPhone 4, iPad (4th gen), iPad Mini, iPad (3rd gen), iPad 2, iPod touch (5th gen), iPod nano (7th gen)
- SPDIF & analogue outputs
- Remote control supplied

The i-device has reached every corner of the globe and is the home to a vast majority of consumer's music libraries. Arcam has engineered a simple way to allow the music fan to transfer their music from their iPod to their audio system. Our new rDock-uni is our most versatile dock yet.

This new audiophile dock for i-devices features the new lightning connector and will allow the music lover listen at a quality level that no other dock can achieve. You can use the high-quality internal DAC on the rDock-uni or you can send a digital signal directly to an audiophile DAC, like the Arcam D33. The result will surprise and delight all who listen.

The rDock-uni will also allow the user to connect their existing 30-pin device to the dock via a rear-mounted USB connector.

The rDock-uni is available now from your Arcam dealer.

DAC

Burr-Brown/TI PCM5102

Frequency Response

10Hz-20kHz, +0 -0.2dB

Total Harmonic Distortion + Noise

0.002%
